

DROP IN ANCHOR

DROP IN ANCHOR Product Introduction:

Drop-In anchors are female concrete anchors designed for anchoring into concrete. Drop the anchor into the pre-drilled hole in the concrete. Using a setting tool expands the anchor within the hole in the concrete.

DROP IN ANCHOR Product Feature:

In order to make the fixation more firm, the surface of the internal forcing casing is usually set with uneven patterns, but the inner wall of the drilling hole is often very rough, and the effect of ordinary pattern is very limited, and it can not play a good role in further reinforcement.

DROP IN ANCHOR Product parameter:

M6/M8/M10/M12/M16

DROP IN ANCHOR Product Application:

- Drop-In anchors should only be used in solid concrete.
- Their main use is to insert threaded rod to suspend electrical cable trays, HVAC ductwork and fire sprinkler pipe and heads.
- They can be used in applications that require a flush mounted anchor and when a bolt needs to be inserted and removed

DROP IN ANCHOR Installation Steps:

First, drop the anchor in the hole with the threaded open end up towards the surface, then insert proper setting tool and hit with a hammer until the Drop-In anchor is fully set.

[YUYAO ALFIRSTE HARDWARE CO., LTD](http://www.yuyao.com) is specialized in the production of screws and anchors. Such as Drywall screw, Hex head/Truss head/CSK head/Pan head self-tapping/drilling screw, Chipboard screw, Construction wood screw, Sleeve anchor, Metal frame anchor, and threaded rods.
