

DRYWALL SCREW

Product introduction:

The name of drywall screw is directly translated from English, and its biggest feature in appearance is the shape of bugle head. It is divided into two kinds of drywall screw with double fine teeth and single coarse teeth. The biggest difference between the two is that the thread of the former is double thread, which is suitable for the connection between gypsum board and metal keel with thickness no more than 0.8mm, and the latter is suitable for the connection between gypsum board and wood keel.

Product Feature:

Recess: Phillips, Square

Head: Flat Bugle

Thread: Coarse/Fine

Product parameter:

Norm: DIN18182

Surface: Black Phosphated, Zinc Plated, Dacromet

Size: M3.5/3.9/4.2/4.8

Product Application:

The product is mainly used for various gypsum board, light partition wall and ceiling series installation.
